

hi, I'm Andrés Solano

As a designer I aim to work with good design practices, but also looking for the best user experience, and always keeping myself in constant learning. As a person, I am a fast learner and hardworking. The reason why I love working as a UX/UI designer is because I've got the possibility to create a connection between people and my work, help users with their problems and make a connection by exploring creative concepts and creating experiences that fit their needs.
